

## Kojair Celebrated 40 years anniversary

Kojair Tech Oy celebrated 40 years anniversary of Kojair Technology 5.6.2009 in Finland. Celebration started already earlier with Kojair's dealers all over the world. On Thursday 4.6.2009 Kojair organized international sales meeting for dealers in Keuruu, Finland. In the meeting there were some key speakers outside from sales organization. Also Kojair's brand new products were present and new Class III Biowizard Safety Cabinet BW3 was presented to all dealers. Same time Kojair organized technical training for our dealer's service personnel.

40 years anniversary celebration started at Kojair factory in Vilppula, Finland. Kojair has invited about 200 guests including some key personnel who started business over 40 years ago. Of course there were key customers and nearly all important dealers, but also our key partners as top management of Vilppula town, suppliers, financial partners etc.

All the guests had possibility to make guided sightseeing at factory and all key products were presented. Official host was Lola Wallinkoski (Miss Finland, 2nd RU Miss Universe) who guided our guests whole day and evening. The first cabinet and the latest cabinet after 40 years were introduced for guests. Between these cabinets Kojair has produced over 15.000 others cabinets for all over the word. After official speeches we awarded some key employees who have been working over 30 years in the company and still doing strong. Also we have special singing group guided by Kojair personnel and included our customers.

Celebration continued by paddle steamer m/s Elias Lönnrot trip from Vilppula to Keuruu, where we had evening party including traditional Finnish food and Kojair wine.

I'd like to thank all participants and Kojair personnel to make this exceptional celebration for leading technology in clear air business.

**Seppo Koskinen, President & CEO**
