

ApexZ

AIRBORNE PARTICLE COUNTERS

When you are looking to take your environmental monitoring program to the next level, the ApexZ is your solution. The power of the ApexZ starts with the most complete system of self-diagnostics in the industry, an enclosure that is sealed, easy to wipe-down, and chemically compatible with all major cleaning solutions, and much more.

Lighthouse has been re-defining particle counting since our very first products. Now the ApexZ is doing it again with features including a handle with integrated status lights*, integrated Wi-Fi, bar code scanner capability, 11-hour battery life with hot-swappable smart batteries, and a true multi-touch enabled display.

The ApexZ is designed to be integrated into your environmental monitoring program. With the ability to wirelessly send data to your computer or server, the ApexZ can be used as a wireless real time sensor. Groups, presets, sample plans and certifications can help to automate and simplify your monitoring routine. The ApexZ gives you various user and security levels, audit trails, and data tags that allow you to record things like batch and lot information, room status, or any other information you want associated with your particle counts. For large scale production facilities, we even offer custom integration and automation solutions.

Contact your local Lighthouse representative and see for yourself where the ApexZ can take you.
